

# ALLINGTON COURT

## REINFORCED BITUMEN MEMBRANE SYSTEM

In the past Allington Court had been considered a typical flat roof scenario, where little consideration had been placed upon future maintenance and detailing work. In order for this to be overcome the preparation in the run up to commencement on-site was vital, with drawings being re-designed and elements simplified, resulting in a practical and aesthetic balance.

Across the 500m<sup>2</sup> site, gutters were formed through the middle of the roof to aid water run off and to eliminate ponding water. Bauder's Euroglaze domed rooflights and standard rooflights were incorporated to exacting standards, achieving a refurbishment solution that would easily outlast the previous installation. A 20 year guarantee and a roof designed for minimal maintenance in the future gave the client, London Borough of Croydon the desired outcome.
