

CRAIGCROOK CASTLE

FLAME FREE REINFORCED BITUMEN MEMBRANE SYSTEM

Craigcrook Castle, Edinburgh was begun in about 1542 and is a building of great historical value so when the roof required a full refurbishment a flame free solution was the only option that would be considered in order to protect the heritage of the building below.

Bauder System Airtech provides a flame free alternative to traditional bitumen based torch-on methods, whilst offering a robust waterproofing solution that is fast to install with a clean finish. It is resilient, tough and long lasting and easily capable of withstanding foot traffic or permanent loads of up to 2000 kg/m².

Client	Charitable Trust
