

CONTINUAL PROFESSIONAL DEVELOPMENT (CPD) SEMINAR

GREEN ROOF LANDSCAPING SYSTEMS

This visual technical presentation lasts approximately one hour and introduces the concept of 'Green Roofing' and explains the differences between the two main design types: -

1. **Intensive** – traditional roof gardens (soil based) with hard and soft landscaping designed mainly for recreation use.
2. **Extensive** – ecological roofs (substrate based) provided purely for environmental reasons - low in weight, cost and maintenance.
3. **Biodiverse** – Living roofs designed to support plant and wildlife by replacing the footprint of the building with a habitat or natural ecological environment.

Issues raised include:-

- Technical, ecological and environmental benefits
- Waterproofing system construction
- Methods of reducing system weight by design
- General design considerations and features
- Irrigation and drainage
- Environmental masking
- Planting methods
- Decking and paving support systems
- Root protection (intensive systems)
- Maintenance
- Case studies
- Our services

Question Time (allow extra 10 - 15 minutes)

Conveniently staged over the lunch time period in the comfort of your offices, our seminars are designed to be as informative as possible whilst keeping disruption to the working day to an absolute minimum.

The best thing about one of our seminars is that we are able to tailor it to suit your needs.

Should your company wish to benefit from a seminar, please register your interest with us.
