

INN THE PARK

INTENSIVE GREEN ROOF

Located between Buckingham Palace and Horse Guard Parade the replacement building for the Cake House had strict requirements identified during the six years it took to plan, design and complete this project. Aesthetics were a high priority as the domed structure was to be totally encapsulated by a green roof, blending seamlessly with the surrounding park. This was achieved through the selection of the Bauder Intensive Green Roof System which offered a natural masking solution that allowed heavy foot traffic without requiring high levels of maintenance.
