

MOAT FARM SCHOOL

FPO SINGLE PLY SYSTEM

Moat Farm School was damaged through fire and the existing roof needed to be removed so that repairs to the deck could be carried out. The Thermoplan-T System was deemed the most suitable due to its aesthetic and environmental credentials. An added advantage was the inclusion of a bituminous vapour barrier, which provided a watertight initial layer allowing internal works to continue immediately whilst the rest of the roofing system was installed.

The Health and Safety aspects associated with this system also meant that roofing works could be carried out safely and efficiently during term-time; due to its flame free installation, thus giving Sandwell Metropolitan Borough Council a roofing solution no longer limiting works to school holidays, an obstacle for any school refurbishment works.

Client	Sandwell Metropolitan Borough Council
Project	Moat Farm School
Architect	Sandwell Metropolitan Borough Council
Approved Contractor	Apex Asphalt
Roof Area	450m ²
System	Bauder Thermoplan-T System
