

CONTINUAL PROFESSIONAL DEVELOPMENT (CPD) SEMINAR

RETROFITTING GREEN ROOFS ON REFURBISHMENT PROJECTS

This visual technical presentation lasts approximately one hour and introduces the concept of retrofitting green roofs on refurbishment projects and explains the hurdles and considerations associated with this type of refurbishment work: -

There are many advantages to retrofitting a green roof and most will be lightweight extensive systems that use plants that are self-sufficient and vitually wind, frost and drought resistant.

Issues raised include:-

- Opportunities
- The options available
- Technical, ecological and environmental benefits
- Factors for consideration
- Loadings
- Existing roof conditions
- Associated costs
- Safe access
- Maintenance
- Expectations of aesthetic finish
- Case studies
- Question Time (allow extra 10 - 15 minutes)

Conveniently staged over the lunch time period in the comfort of your offices, our seminars are designed to be as informative as possible whilst keeping disruption to the working day to an absolute minimum.

The best thing about one of our seminars is that we are able to tailor it to suit your needs.

Should your company wish to benefit from a seminar, please register your interest with us.
