

ST. VINCENT'S UNIVERSITY HOSPITAL

BAUDER TOTAL GREEN ROOF SYSTEM WITH SEDUM BLANKET

St. Vincent's University Hospital has strong beliefs about caring for their patients and the environment. Already familiar with Bauder, Scott Tallon Walker suggested a Bauder Extensive Green Roof System to achieve an environmentally friendly roof without compromising the performance of the waterproofing.

Recycled materials are used within the landscaping components to minimize the impact on the environment. The roof, with its sedum planting not only looks aesthetically pleasing but maintains the standard of waterproofing and workmanship associated with Bauder.
