

CANMORE HOUSING, DUFF STREET

BAUDER TOTAL GREEN ROOF SYSTEM WITH SEDUM BLANKET

Canmore Housing's development in Duff Street, Edinburgh provides affordable housing to rent. The new construction was overlooked by neighbours and so an extensive sedum green roof was selected for its aesthetic appearance on the barrel vault roof.

With slopes in excess of 30 degree the best landscaping option was a sedum blanket with rolls cut to the width of the roof, offering a practical and ecological solution which placed the environment first. A statement further complimented by the use of the Bauder Thermoplan Single Ply membrane on the balcony's, manufactured from flexible polyolefin this represents a new generation of environmentally friendly synthetic waterproofing membranes.
