

BAUDER RETROFITS LANDMARK BUILDING

DU CANE COURT, BALHAM

Du Cane Court is a 1930's landmark building, which upon retrofitting at the turn of the century was the largest privately owned block of flats in Europe with 676 flats populated by over 1000 residents. The brief for this complex project was to combine outstanding insulation and guaranteed long-term waterproofing. Installation had to take place in 14 weeks, beginning in January, with work only being carried out between 9am and 5pm on weekdays to minimise the impact upon the residents who remained in situ.

The Bauder Total Roof System was specified by the Estate Manager due to its proven long-term performance and insurance back guarantee. The project was completed on time, leaving residents safe in the knowledge that they had a roofing solution that would give them many years of trouble-free service.
