

BAUDER PASSES WITH HONOURS AT THE UNIVERSITY OF MANCHESTER

THE ARCHITECTURAL BUILDING, UNIVERSITY OF MANCHESTER

The brief for The University of Manchester's Architectural Building was always clear. They needed a long-term roofing solution that combined outstanding insulation and waterproofing without compromising on the high levels of natural light required. The existing roof offered an amazing 970m² area of glazed roofing providing the natural light needed in the classrooms below, however this made working on the top floor during the summer and winter months unbearable due to the dramatic changes in temperature.

NAI Gooch Webster were selected with a specification for a Bauder Total Roof System, incorporating 80mm of insulation with 130 450mm diameter SunPipes spaced out across the 1385m² roof to boost the natural light levels and achieve the complex brief set out by the University. The roof was delivered on time in just 10 weeks and within budget, leaving the Architectural Building with a dramatically enhanced roof and a 20 year guarantee.

Client:	The University of Manchester
Specifier:	Gooch Webster
Approved Contractor:	K Pendlebury and Sons Limited
Roofing System:	Bauder Total Roof System
	Total System Build Up 67.2mm
	Total System Weight 17.2kg/m ²
