

## MODERN ROOF FOR ROMAN REMAINS

### BRADING ROMAN VILLA, ISLE OF WIGHT

Housing the remains of Roman mosaics, Brading Roman Villa is a sustainable construction with a high priority on both low maintenance and running costs. Stabilising the internal temperature was essential in order to balance the seasonal temperature changes of hot summers and cold winters, both of which damage these priceless historical relics. The incorporation of the extensive sedum blanket on the sloping and concave roofs met all of the requirements, whilst helping to provide temperature stability.

#### NATIONAL ROOFING AWARDS FLAT ROOFING ALLIANCE 2005

##### Winner of Best New Build – Best Project

“This project combined innovation, excellent attention to design and detailing and a high quality installation on site... Good example of close partnering between manufacturer and local contractor.”
