

BAUDER REACHES NEW HEIGHTS

EXWICK HEIGHTS PRIMARY SCHOOL, EXETER

Exwick Heights is a preschool and primary school that has been built on a Greenfield site outside Exeter. This two-storey building is tucked into the hillside contours in order to minimise its impact. The ethos behind the design was to minimise energy usage and to specify robust self finish materials with an enhanced life cycle to reduce ongoing maintenance whilst using innovative techniques such as 'soft' SUD's systems.

The Bauder sedum green roof at Exwick Heights provides an external classroom which supports the indoor learning environment. It teaches pupils and staff about sustainability firsthand whilst providing visual stimulation with its seasonal colour changes. Environmental awareness has become paramount in today's society, so what better place to start educating people than at a primary school?
