

NEW ROOF IS A CREDIT TO NAVAN CREDIT UNION

NAVAN CREDIT UNION, IRELAND

Sustainable buildings are a growing culture in Ireland and as the first five storey timber framed construction, Navan Credit Union is a true representation of what is possible. Built using the 'Factor 10' principle which encourages the efficient use of less materials, this building proves the effectiveness of a sustainable design.

A variety of green roofs were incorporated in the design to maximise the roof space and provide an accessible 120m² roof garden as well as utilising sedum blanket for visual greening. Bauder's knowledge and expertise were key criteria for the client to ensure the project was delivered exactly as envisaged as well as on time and within budget.
