

## GREEN ROOF FOR HEALTHIER OUTLOOK

### ST. VINCENT'S UNIVERSITY HOSPITAL

St. Vincent's University Hospital has strong beliefs about caring for their patients and the environments. Already familiar with Bauder, Scott Tallon Walker suggested a Bauder Extensive Green Roof System to achieve an environmentally friendly roof without compromising the performance of the waterproofing. With maximum use of recycled materials, attaining minimum impact on nature, the system met the briefs requirements. A roof that not only looks aesthetically pleasing but maintains the standard of waterproofing and workmanship associated with Bauder.

*"This building which is overlooked from the Hospital wards of the adjoining buildings demonstrates how the design team at Scott Tallon Walker got it right. They have brought together a multitude of environmental benefits by having a living roof. It is aesthetically pleasing, blends in with the environment and gives a ray of life and colour to what would normally be a traditional flat roof system."*

**Francie Thornton, Bauder**
