

GREEN ROOF FOR RIVERGREEN HOUSING

THE WYND, AMBLE

The Wynd, a contemporary housing development design by Award Winning Developers Rivergreen, comprising of twelve 4 bedroom houses. Built in the small Northumbrian port of Amble, they provide stunning views of Amble Marina and Warkworth Castle. Rivergreen are committed to improving housing complexes across the North East, trying to make them as sustainable as possible. Every material is researched to ensure that it is environmentally friendly and functional. The houses aesthetics also had to reflect Rivergreen's signature finish.

The Bauder Sedum Roof was installed in conjunction with zinc roofs to combine design interest with environmental awareness. The Sedum roofs are visual reminders of sustainability, providing benefits to the environment, for example, they help to manage rainwater run-off and regain biodiversity of wildlife by creating a range of micro-habitats. Financially, they increase the life expectancy of the roof, reduce building running costs and add overall property value.

Client:	Rivergreen Developments PLC
