

BAUDER PROVIDES CARPET OF GREEN

WOODS END LODGE, ATTLEBOROUGH

This privately owned house in Attleborough successfully combines modern construction with the tranquillity of its woodland surroundings to create a harmonised building. Sedum blanket was installed on the multi-levelled curvature of the roofs allow for a magnificent visual effect.

The complexity of Woods End Lodge meant that two layers of 50mm thick insulation was installed to meet the flexibility needed when insulating the iconic curves of the roof. Straight aluminium trims were cut and fixed to the tight curved perimeters, giving the roof a crisp, elegant silhouette. The triumph of this build is in its attention to detail, from its selection of materials to its inspired design, Woods End Lodge is a project that has taken professional detailing to another level.
