

SAINSBURYS GO GREEN AT THE SEASIDE

SAINSBURYS LOADING BAY, HOVE

When the new Sainsbury's Loading Bay at Hove was first designed, the criteria dictated that the building must blend into the countryside without penetrating the scenery. The idea was to install a green roof that would mature and be allowed to grow wild over the coming years, whilst still providing a robust waterproofing build up underneath.

The Bauder Intensive Green Roof was incorporated over the loading bay some 16 years ago, when the system was only a decade old within the UK. Since then the landscaping has flourished into a wild meadow, creating a natural habitat for small mammals and birds – exactly as the Client and Architect foresaw it, and before green roofs became the norm.

Today, as then, Bauder's policy still remains to invest in continual research and development to ensure their systems remain at the cutting edge of green roof technology.

Client: J Sainsburys Plc
Specifier: Chetwood Green
Approved Contractor: Gorvin Roofing
Roofing System: Intensive Green Roof System
