

NO DEBATE – SCOTTISH PARLIAMENT HAS AN EXCEPTIONAL GREEN ROOF

SCOTTISH PARLIAMENT

The Scottish Parliament building is a true visual testimony to Scotland's appreciation of environmental awareness by bringing a vibrant roof garden into the heart of the historical city of Edinburgh.

Bauder provided components to support a lightweight green landscaping that could be moulded into the building's form. Expanded polystyrene blocks were cut and shaped accordingly to create undulating scenery to echo the Parliament building's stunning backdrop.

The relevant components ensured that the complex brief was met with ease. With landscaping elements at varying levels having to be individually created to perform different functions, the readily available on-site support provided by Bauder became a main key factor to the complete success of this large and complex project.

Client: Scottish Parliament
Specifier: RMJM Scotland Limited
Approved Contractor: Laing O'Rourke Civil Engineers
Roofing System: Bauder Intensive Green Roof
