

FLAME FREE SOLUTION FOR MOAT FARM SCHOOL

MOAT FARM SCHOOL, BIRMINGHAM

When Bauder were approached with the brief for Moat Farm School, they were asked simply to strip the existing fire damaged roof and repair the deck below. Understanding that one of the reasons they were approached was due to their system's aesthetic and environmental factors, the Thermoplan-T System was deemed the most suitable for this challenge – a first for the Midlands. An added advantage of this type of roofing solution meant that by using the Bauder KSD bituminous vapour barrier, the full roof could be striped prior to the Thermoplan-T System being installed, thus eliminating the risk of water ingress during the works.

The Health and Safety aspects associated with this system also meant that roofing works could be carried out safely and efficiently during term-time; due to the systems flame free installation, thus giving Sandwell Metropolitan Borough Council a roofing solution no longer limiting works to school holidays, an obstacle for any school refurbishment works.

Client:	Sandwell Metropolitan Borough Council
Specifier:	Apex Asphalt
Approved Contractor:	Apex Asphalt
Roofing System:	Bauder Thermoplan-T System
	Total System Build Up 92.4mm
	Total System Weight 5.47kg/m ²
