

Bauder Insulated Upstand Support Bracket

18.05.2026

Product description Bauder Insulated Upstand Support Bracket made from galvanised steel.

Application fields For use in conjunction with 30mm BauderPIR Insulation on vertical upstands to follow the guidelines of 'Accredited Construction Details' and satisfying the requirements of Part L of Building Regulations. The bracket is mechanically fixed through the pre-drilled holes, and through the AVCL to provide a hard edge to the top of the vertical insulation.

Article Number GB60240210

Characteristic	Unit	Value
Material		galvanised steel
Length	mm	2000
Thickness	mm	0.6
Fixing holes	mm	18 x 5 slots @ 250 centres
Supply form	per box	20

Normative references For updated references, the latest edition of the referenced document (including any amendments) applies.

Storage guidance The product should be stored dry, protected against weathering, and must not be exposed to temperatures exceeding 35°C. The products must not be exposed to a direct naked flame or other ignition sources, or to solvents or other chemicals. Ensure the product(s) are clear of buildings and any other storage areas. Where there are storage containers on site, these may be suitable for storing products. Brackets that have become wet must be allowed to fully dry out naturally before use.

Packaging material The product will be delivered in a cardboard box (readily recyclable) containing 20 lengths of upstand support bracket.

Handling/PPE All persons using the product should be fully aware of the manual handling methods as roofing materials are heavy and can cause serious injury. When using the product, installers should be provided with, and wear, suitable personal protective equipment.

Disposal guidance This product can be readily recycled. Disposing of any waste material must be carried out in accordance with national regulations.
