

### TECHNICAL DATA SHEET

# BauderGREEN AL 40 edge trim BauderGREEN AL 150 edge trim

Bauder's range of aluminum edge and drainage trims retain the vegetation on an extensive green roof. They are designed for use with BauderGREEN XF 301 and other BauderGREEN substrate-based systems.

### **Intended Use**

Perforated edge/drainage trims used to frame and retain the green roof build up. The trims allow the free movement of rainwater to aid drainage.

AL 40 is specifically designed to be used with BauderGREEN XF301 sedum blanket on flat and pitched roofs.

AL150 is specifically designed to be used with BauderGREEN SUB substrate based, extensive green roof systems.

### INSTALLATION GUIDANCE

Normally installed directly onto waterproofing, the edge trims can be welded down using lengths of the waterproofing membrane. The trim is used to separate the pebble margin and to frame the green roof build up and should be completed and inspected prior to living material being delivered to site.

See Bauder's Green Roof Installation Guide for full details.
